# COMMUNITY DATA & INFORMATION SHARING

DCHC | FEB 2023

HOW WE GOT ONTO THIS TOPIC

Council Roster ✓

Meetings & Minutes ✓

Rural Health Scholars Projects ✓

Community Health Landscape ✖

Idea for functioning website → ✖ → Useful community data

Collecting data assets
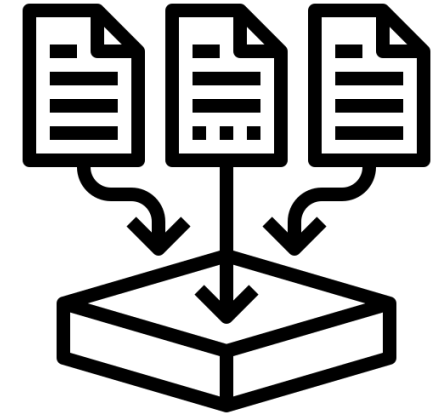

WHY GO THROUGH THE EFFORT?

Grant / Funding Applications

Reporting & Quality Improvement
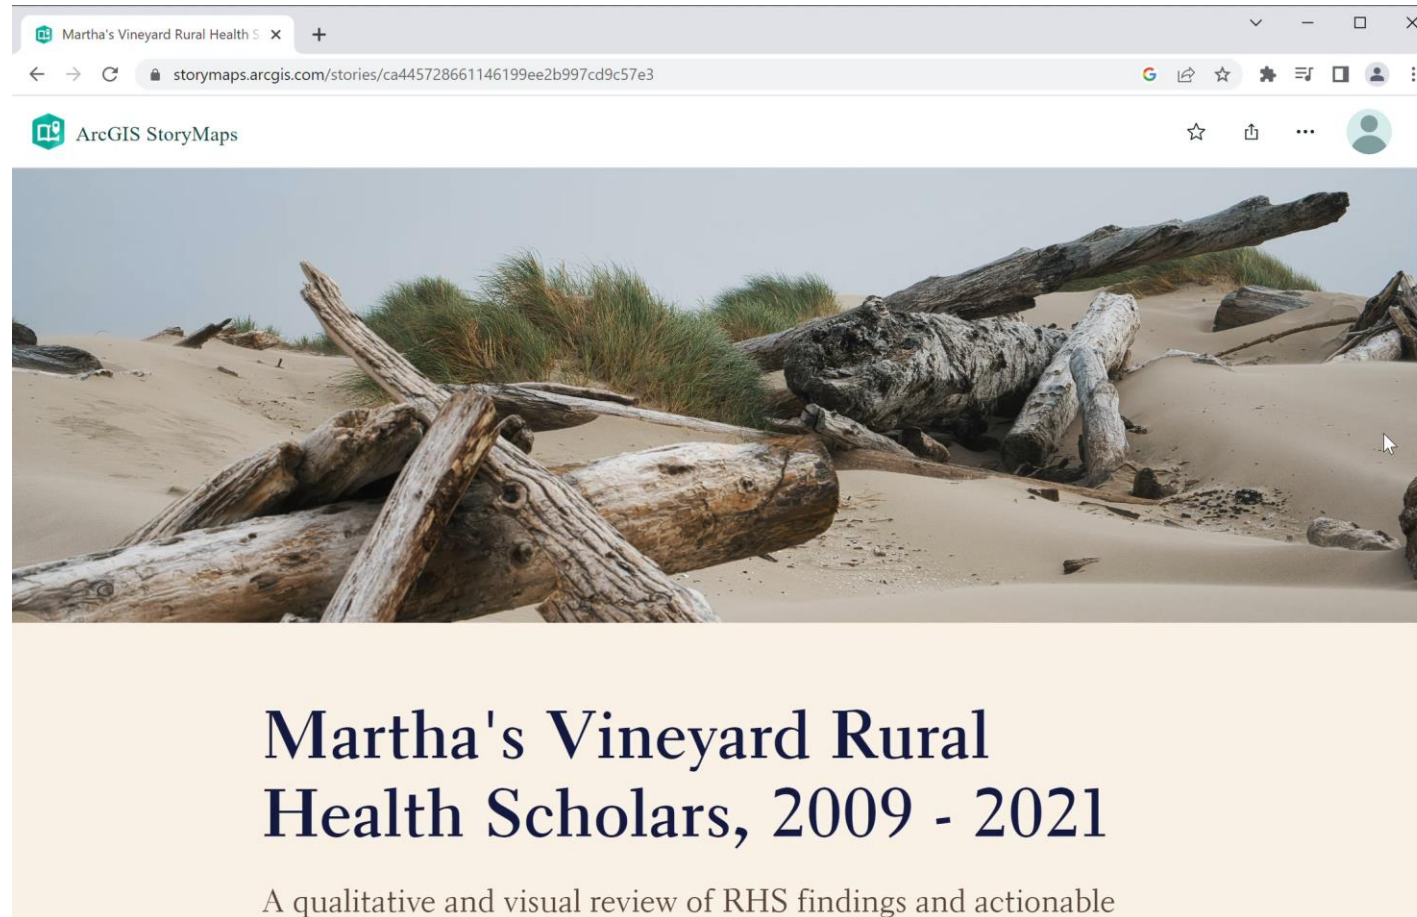

Finding Commonalities & Discrepancies

Formulating Shared Metrics

PLUS, WE'VE ALREADY HAD SUCCESS

WHAT IS A DATA ASSET?

LET'S EXPLORE

WHAT CAN ORGANIZATIONS CONTRIBUTE (DATA ASSETS)

A data asset could be…

A **QUANTIATIVE** annual report, community health assessment, dataset, monthly/quarterly report

400 (28%) of patients have Hypertension

200 Patients Received Treatment for Lyme Disease in 2022

Of the 300 patients with diabetes, 150 attended a diabetes appointment with their PCP in 2022

DATA ASSETS CONTINUED

A data asset could also be…

A QUALITATIVE annual report, community health assessment, interview, monthly/quarterly report, feedback from patients, staff, or organization partners

"Affordable year-round housing has been the biggest obstacle to retain and attract new hospital staff." - MVH leadership

"I would be able to attend more appointments if there were more reliable public transportation options." – IHC patient

ROADMAP & THINGS TO CONSIDER

- Who holds what data / information?

- How to submit the data

- Where to keep submitted data

- How to analyze submitted data (*SAPHE Inter-Island Public Health)

- If necessary, how to re-package the data for readability/usability

- How to share the data (ex. among the council only, publically)

FIRST STEPS

- Charge to Council members: Self reflection about the data your organization <u>ALREADY</u> collects

- **Suggestion**: Each member organization participate in a key informant interview (10 min)

- **Suggestion**: D&I Committee to figure out a proper place to house this information by mid-Spring

- Island-Integrated Population Health Specialist to serve as the Data Steward

  - A collection of tasks that is already a part of their day-to-day scope of work
